**CUTS IRONING
TIMES IN HALF**

A starburst graphic with a yellow-to-orange gradient. Inside the starburst is a large '1/2' symbol, indicating a 50% reduction in ironing time.

The high-speed rotary ironers from PFAFF

... iron in no time flat!

With or without steam, the high-speed rotary ironers from **PFAFF** iron absolutely anything that comes out of your washing machine. And you can sit down while your' re working! It couldn't be easier.

With the two free ironing-shoe ends and a bit of practise you can iron a shirt in less than 5 minutes! Even the most difficult materials such as velvet and silk are ironed perfectly and with ease.

Use the power of steam!

After just 1 minute the high-speed rotary ironer is ready for steaming. Even difficult materials are ironed perfectly and gently without previous moistening. And if you take a rest, the steam switches off automatically.

By the way:

Because it's faster, you save electricity, energy and time - your leisure time!

The high-speed rotary ironers from PFAFF:

- 1 The only ironing machines with two open ironing-shoe ends. Ideal for tubular pieces of laundry!
- 2 With electronically controlled roller-speed!
- 3 Only from PFAFF! Roller on top, ironing shoe on the bottom, just as on professional hot-mangles.

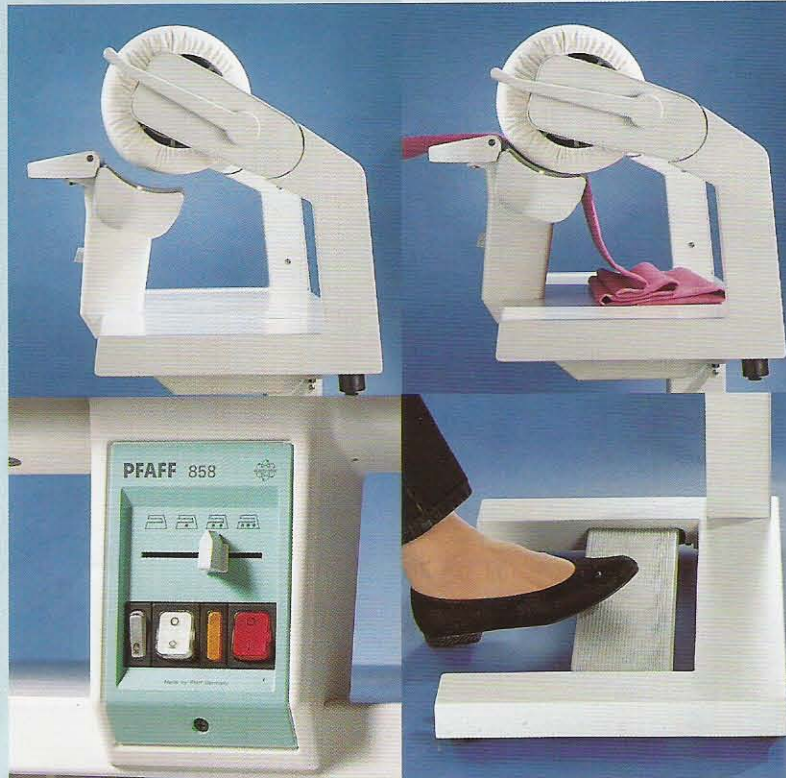

The large heating surface is ideal for very large pieces of laundry such as bed linen, curtains etc...

With the right technique everything runs smoothly!

Inserting the article to be ironed is particularly easy. Simply place it on the heating shoe and the movable roller presses against it from above.

The steam from below ensures especially effective permeation of the material.

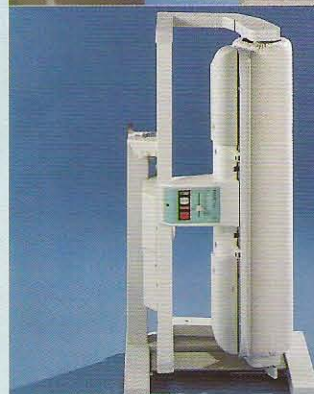

The temperature can be infinitely adjusted to suit 30, 60, and 95 degree laundry.

Pfaff high-speed rotary ironers are equipped with an extra large rack to ensure that your ironing remains flat after being ironed!

The pedal bar controls the roller pressure, roller speed and the steam.

Finished ironing?
Just fold up the high-speed rotary ironer. Thanks to its wheels it is easy to roll away and store in the smallest of spaces.

IT'S YOUR CHOICE

High-speed rotary ironer 658 electronic
with steam, roller length 65 cm

High-speed rotary ironer 858 electronic
with steam, roller length 85 cm

Safety first!

The heating shoe is on the bottom on PFAFF HIGH-SPEED ROTARY IRONERS, so the material to be ironed is always between the heating foot and your hands. Nothing can go wrong. The water is **not** heated in the tank, so there is no risk of a pressure build-up.
